

Please give us some peace. Anyone should have permission or be invited to visit a home before visiting. My family feels all these calls from total strangers are a violation of our privacy. It doesn't matter who these calls are from. They do not remove you from their lists when you ask them to, even though it is law that require them to do so. These calls to our home interfere with emergency and other important calls affecting our family. There are sooo many of these calls it affects all aspects of our family life. Really, something must be done.

Kind Regards,

Melanie C. Baker
